

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	20 November 2023
Team ID	61511A322310DCD872E42EBBA3D84B6E
Project Name	Ethereum decentralized identity smart contract
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👥 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM
How might we [your problem statement]?

Key rules of brainstorming
To run a smooth and productive session

➕ Stay in topic. 💡 Encourage wild ideas.

➕ Defer judgment. 👂 Listen to others.

🗣️ Go for volume. 👁️ If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

⌚ 10 minutes

TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Person 1

Decentralized identity provides a representation of ourselves, private and public	It is a digital identifier for people, companies and even the PC, change of their idea is allowed	Decentralized identity is a self-owned independent digital representation
---	---	---

Person 2

<p>Books often demand digital analysis, such as online access, and are available in multiple languages, even as specialized translations.</p>	<p>Discs or DVDs of almost any CD/DVD are available, both, and can be shared by individuals.</p>	<p>They can be made available on the desktop, groups, or government and public.</p>
---	--	---

Person 3

[illegible]

Person 4

Public key infrastructure (PKI) enables the decentralized identification of each person.

Person 5

<p>Exclusion and inclusion should be used to collect information through an online opinion survey</p>	<p>They can make the individual control of identifying the website</p>	<p>Exclusion and inclusion should be used to collect information through an online opinion survey</p>
---	--	---

Person 6

Great customer experiences are made that define a company and contribute to a transformation in the marketplace	They are shared and multiplied on the Internet and serve as a trigger for change by example	They can become a competitive advantage, or become a liability if they go wrong
---	---	---

Person 7

<p>They are serious seriously we cannot afford a 100% bacteriophage index indicating a virus infection of high or low levels</p>	<p>They are serious bacteriophage index of several orders above 100 show immediate action as for virus infection</p>	<p>They are serious more advanced and constant activity between 100 and 1000 with acute aggressive infection</p>
---	---	---

Person 8

Smart contracts are designed to be transparent, which means that all parties involved in a transaction

In their management, smart contracts are often transparent and efficiency

They should enable the introduction of a upgrade of the code / logic

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H** key on the keyboard.

Importance

If each of these factors could get done without any difficulty or cost, which would have the most positive impact?

They can enable multi-signature verification

Blockchains are basically made by a digital wallets

Decentralized is a digital identification concepts and it is a self-owned

Smart contracts are stored and executed on the blockchain and can be triggered by events and they can automate the complex processes

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
